What Changed

Brand icon V5 — replaced inline SVG logo

Removed the original inline SVG logo mark from shared.js and replaced it with the V5 brand icon PNG asset. Added apple-touch-icon.png (512px), favicon.ico, favicon.png, and icon-96.png. Added OG image meta tags and favicon link tags across all pages.

Fix phone mockup icon + absolute URL for header logo

Corrected the brand icon shown inside the phone mockup screenshot on the home page. Switched the header logo src to an absolute URL to ensure it loads correctly from both the custom domain and the github.io fallback URL.

Why It Changed

The launch used a placeholder inline SVG logo. V5 brand icon assets were ready and needed to be wired in across the site. Favicon and OG image tags were missing from launch.

Licensing Impact

No third-party image licenses involved. All content is original or derived from proprietary Tank Care Buddy assets.
